ENGINEERING EXCELLENCE IN SEALING SOLUTIONS FROM THE HEART OF BURGUNDY (FRANCE)

Founded in 1997, Repack-S is a sealing system and self-lubricated bearing solution specialist with many years of experience in beverage packaging, confectionary packaging as well as food processing lines.

Repack-S meticulously engineers, manufactures and supplies highly effective and reliable dynamic sealing systems for high-speed PET bottle blowing & filling lines (inc. aseptic ones), glass bottle filling lines and all kinds of food processing machines.

Typical processed media (hot or cold, with CO₂ injection or without) include:

- ✓ Mineral water
- ✓ Carbonated soft drinks (CSD)
- ✓ Pasteurised juices
- ✓ Spirits & wines
- ✓ Dairy products (milk, etc.)
- ✓ Food oils
- ✓ Sauces

Typical applications include:

- ✓ 40 bar actuators & manifolds
- ✓ Rotary joints (distributors)
- ✓ Filling valves
- ✓ Dosing heads
- ✓ Pumps & valves
- ✓ Capping machines

HELPING OUR CUSTOMERS SOLVE THEIR SEAL AND GUIDE BEARING RELATED PROBLEMS IS OUR **PASSION!**

Repack-S engineers regularly create new innovative, yet suitably economical solutions to improve both machine efficiency – through higher outputs & lower energy consumption – and capital equipment uptime – through increased MTBM.

Our hygienic sealing systems and self-lubricated bearing solutions offer excellent resistance to SIP-SOP processes as well as to the most aggressive cleaning agents used for WIP/CIP-COP steps.

To ensure our customers keep machine downtime to an absolute minimum, Repack-S offers to keep a permanent inventory of ready-to-be-transformed engineering plastics and rubber compounds that meet the most stringent requirements from the FDA, 3-A and USP as well as the REACH, food contact EC1935/2004 and EC10/2011 regulations.

With all materials and processes being fully traceable combined with comprehensive sets of quality checks and controls (detailed production records are kept for a minimum of 5 years), you will find in Repack-S not only an **innovative & flexible partner** but also a **reactive and highly dependable one!**
